

Naive Set Theory

Andrew Pennebaker

February 9, 2011

$$A = \{a, \text{set}(a)\}$$

$$B = P(A)$$

$$|A| = x$$

$$|B| = 2^x$$

$$x > 1$$

$$2^x > x$$

$$|B| > |A|$$

$$A \neq \{a, \text{set}(a)\}$$
